Why attend

As organisations deploy AI in hiring, lending, customer service and operations, they face new risks: biased decisions, opaque models, privacy breaches and regulatory penalties. This course gives leaders a practical framework for responsible AI, covering fairness, transparency, accountability, human oversight, impact assessment and emerging regulation such as the EU AI Act.

Trust in AI is now a business requirement. You will learn how to identify AI risks early and put proportionate controls in place without blocking innovation.

Professional Problems This Course Is Designed to Solve

• Difficulty translating subject knowledge into practical workplace decisions.
• Inconsistent approaches to the activities covered in the course outline.
• Lack of a structured plan for applying and reviewing new skills.

Course methodology

Case studies of AI failures, risk assessment workshops, policy drafting exercises and debates on ethical dilemmas.

Course objectives

By the end of this course, participants will be able to:
• Explain key ethical principles for AI
• Identify bias, transparency and privacy risks in AI systems
• Conduct an AI impact and risk assessment
• Design human oversight and accountability mechanisms
• Understand emerging AI regulation and its obligations
• Build a responsible AI governance framework

Target audience

This course is suitable for:
• Business leaders deploying AI
• Risk, compliance and legal professionals
• Data science and technology managers
• HR and customer service leaders using AI tools
• Internal auditors

Course content
