Course content

Why attend

Information security management systems set policies, risk assessments and controls to protect information. This course covers auditing information security management against frameworks such as ISO 27001: governance, risk assessment, policies, asset management, access control, supplier security, incident management and continual improvement.

A certificate on the wall does not guarantee security. You will learn to audit whether information security is effective in practice.

Professional Problems This Course Is Designed to Solve

• Difficulty translating subject knowledge into practical workplace decisions.
• Inconsistent approaches to the activities covered in the course outline.
• Lack of a structured plan for applying and reviewing new skills.

Course methodology

Framework-based audit exercises, evidence review, interview practice and case studies.

Course objectives

By the end of this course, participants will be able to:
• Explain information security management system requirements
• Audit security governance and policies
• Evaluate information risk assessments
• Test key security controls
• Review supplier security and incident management
• Assess continual improvement

Target audience

This course is suitable for:
• IT and security auditors
• Internal auditors
• Information security managers
• Compliance professionals
• ISO auditors

Course content

Target competencies

Participants will develop competencies in:

- ISMS auditing
- Risk assessment review
- Control testing
- Evidence evaluation
- Reporting

Course outline
