Why attend

Sometimes incremental improvement is not enough and processes must be fundamentally redesigned. This course covers business process reengineering: selecting processes, understanding current state, radical redesign principles, enabling technology, organisational impacts, implementation and managing the risks of major change.

Reengineering can deliver dramatic improvements but carries risk. You will learn when and how to redesign processes successfully.

Professional Problems This Course Is Designed to Solve

• Difficulty translating subject knowledge into practical workplace decisions.
• Inconsistent approaches to the activities covered in the course outline.
• Lack of a structured plan for applying and reviewing new skills.

Course methodology

Process redesign workshops, case studies of successful and failed reengineering, and implementation planning.

Course objectives

By the end of this course, participants will be able to:
• Distinguish reengineering from incremental improvement
• Select processes for redesign
• Analyse current processes
• Apply radical redesign principles
• Use technology as an enabler
• Plan and manage implementation

Target audience

This course is suitable for:
• Process improvement leaders
• Transformation managers
• Business analysts
• Operations directors
• IT managers

Course content
