Why attend

Measuring equipment must be calibrated to ensure reliable results. This course covers calibration management: measurement traceability, calibration intervals, procedures and records, uncertainty basics, out-of-tolerance investigations, calibration suppliers, software tools and audit requirements.

Uncalibrated equipment undermines product quality and compliance. You will learn to run an effective calibration programme.

Professional Problems This Course Is Designed to Solve

- Difficulty translating subject knowledge into practical workplace decisions.
- Inconsistent approaches to the activities covered in the course outline.
- Lack of a structured plan for applying and reviewing new skills.

Course methodology

Calibration programme design exercises, interval setting, out-of-tolerance case studies and record reviews.

Course objectives

By the end of this course, participants will be able to:

- Explain calibration and measurement traceability
- Build an equipment register
- Set and adjust calibration intervals
- Manage calibration procedures and records
- Investigate out-of-tolerance results
- Manage calibration suppliers and audits

Target audience

This course is suitable for:

- Calibration and metrology technicians
- Quality engineers
- Laboratory staff
- Maintenance staff
- Quality auditors

Course content

Target competencies

Participants will develop competencies in:

- Traceability
- Interval setting
- Record management
- Investigation
- Supplier management
