Why attend

Circular supply chains keep products and materials in use through reuse, repair, remanufacturing and recycling. This course covers circular economy principles, reverse logistics design, returns management, product recovery options, partnerships, regulation such as extended producer responsibility, and business models.

Circularity reduces waste, cost and environmental impact while creating new revenue. This course helps you design practical circular supply chains.

Professional Problems This Course Is Designed to Solve

• Difficulty translating subject knowledge into practical workplace decisions.
• Inconsistent approaches to the activities covered in the course outline.
• Lack of a structured plan for applying and reviewing new skills.

Course methodology

The course uses case studies, reverse logistics design workshops, business model exercises and regulatory reviews.

Course objectives

By the end of this course, participants will be able to:
• Explain circular economy principles
• Design reverse logistics networks
• Manage returns efficiently
• Evaluate product recovery options
• Understand extended producer responsibility
• Develop circular business models

Target audience

This course is suitable for:
• Supply chain and logistics managers
• Sustainability managers
• Product and operations managers
• Procurement professionals
• Retail and e-commerce managers

Course content
