Course content

Why attend

Climate change brings physical risks such as floods and heat, and transition risks from regulation, technology and markets. This course covers climate risk management: identifying climate risks and opportunities, scenario analysis, financial impact assessment, integrating climate into risk management and strategy, metrics and disclosure.

Climate risk is a financial risk that investors and regulators expect organisations to manage. You will learn practical assessment methods.

Professional Problems This Course Is Designed to Solve

- Difficulty translating subject knowledge into practical workplace decisions.
- Inconsistent approaches to the activities covered in the course outline.
- Lack of a structured plan for applying and reviewing new skills.

Course methodology

Scenario analysis exercises, risk mapping workshops, case studies and disclosure reviews.

Course objectives

By the end of this course, participants will be able to:

- Explain physical and transition climate risks
- Identify climate risks and opportunities
- Apply climate scenario analysis
- Estimate financial impacts
- Integrate climate into ERM and strategy
- Report climate risks and metrics

Target audience

This course is suitable for:

- Risk managers
- Sustainability managers
- Finance and strategy professionals
- Board members
- Investment professionals

Course content

Target competencies

Participants will develop competencies in:

- Climate risk identification
- Scenario analysis
- Financial impact assessment
- Risk integration
- Climate disclosure

Course outline

Day 1: Climate Risk
