Why attend

Temperature-sensitive products such as food, pharmaceuticals and vaccines require controlled conditions from production to consumption. This course covers cold chain principles, packaging, storage and transport, temperature monitoring, regulatory requirements, risk management and excursion handling.

Cold chain failures cause product loss, safety risks and regulatory issues. This course helps you design and manage reliable cold chains.

Professional Problems This Course Is Designed to Solve

• Difficulty translating subject knowledge into practical workplace decisions.
• Inconsistent approaches to the activities covered in the course outline.
• Lack of a structured plan for applying and reviewing new skills.
