Why attend

Processes are often designed around internal convenience rather than customer needs. This course teaches customer-centric process design: understanding customer needs and journeys, outside-in process analysis, designing for simplicity and speed, service blueprints, testing with customers and measuring customer outcomes.

Customers judge organisations by how easy they are to deal with. You will learn to design processes from the customer's point of view.

Professional Problems This Course Is Designed to Solve

• Difficulty translating subject knowledge into practical workplace decisions.
• Inconsistent approaches to the activities covered in the course outline.
• Lack of a structured plan for applying and reviewing new skills.

Course methodology

Journey and process mapping, service blueprint workshops, customer testing exercises and case studies.

Course objectives

By the end of this course, participants will be able to:
• Understand customer needs and expectations
• Analyse processes from the outside in
• Design simple, fast customer processes
• Use service blueprints
• Test process designs with customers
• Measure customer outcomes

Target audience
