Why attend

The Digital Operational Resilience Act sets uniform requirements for how financial entities in the EU manage information and communication technology risk. This course explains DORA's five pillars: ICT risk management, incident management and reporting, digital operational resilience testing, third-party risk management and information sharing. Participants learn how to assess compliance gaps, strengthen governance, manage critical ICT providers and prepare evidence for supervisors, with practical templates and case studies from financial institutions.

DORA places direct accountability on management bodies and requires detailed controls, testing and reporting. This course helps you understand what the regulation requires, how it applies to your organisation and how to build a practical compliance programme that also improves real operational resilience.

Professional Problems This Course Is Designed to Solve

• Difficulty translating subject knowledge into practical workplace decisions.
• Inconsistent approaches to the activities covered in the course outline.
• Lack of a structured plan for applying and reviewing new skills.

Course methodology

The course combines expert sessions on the regulation and technical standards with gap-assessment workshops, incident classification exercises, third-party register development and tabletop resilience scenarios. It provides practical guidance and does not constitute legal advice.

Course objectives

By the end of this course, participants will be able to:
• Explain the scope, objectives and structure of DORA
• Implement an ICT risk management framework aligned with DORA
• Classify and report major ICT-related incidents
• Plan digital operational resilience testing programmes
• Manage ICT third-party risk and maintain the register of information
• Conduct a DORA gap assessment and build a remediation plan
