Why attend

Enterprise architecture connects business strategy to processes, data, applications and technology so that change is coordinated rather than chaotic. This course introduces enterprise architecture practice using TOGAF concepts: the architecture development method, building blocks, viewpoints, governance and roadmaps, with practical exercises on real organisational scenarios.

Without architecture, organisations accumulate duplicated systems and fragile integrations. You will learn a structured way to plan and govern change across the enterprise.

Professional Problems This Course Is Designed to Solve

• Difficulty translating subject knowledge into practical workplace decisions.
• Inconsistent approaches to the activities covered in the course outline.
• Lack of a structured plan for applying and reviewing new skills.

Course methodology

Method walkthroughs, architecture modelling exercises, case study of a transformation programme and governance role plays.

Course objectives

By the end of this course, participants will be able to:
• Explain the purpose and value of enterprise architecture
• Describe the TOGAF architecture development method
• Model business, data, application and technology architectures
• Develop architecture roadmaps and transition plans
• Set up architecture governance and principles
• Communicate architecture to business stakeholders

Target audience
