Why attend

The EU Artificial Intelligence Act introduces the world's first comprehensive legal framework for AI, with obligations that depend on the risk level of each AI system. This course explains the Act's scope, risk categories, prohibited practices, requirements for high-risk systems, transparency obligations, general-purpose AI rules and enforcement timeline. Participants learn how to build an AI inventory, classify systems, assess gaps and implement governance processes that support compliance and responsible AI use across the organisation.

Organisations that develop, deploy, import or distribute AI systems in the EU must understand their obligations and prepare in time. This course gives you a practical compliance approach, translating legal requirements into governance processes, documentation and controls that your organisation can implement.

Professional Problems This Course Is Designed to Solve

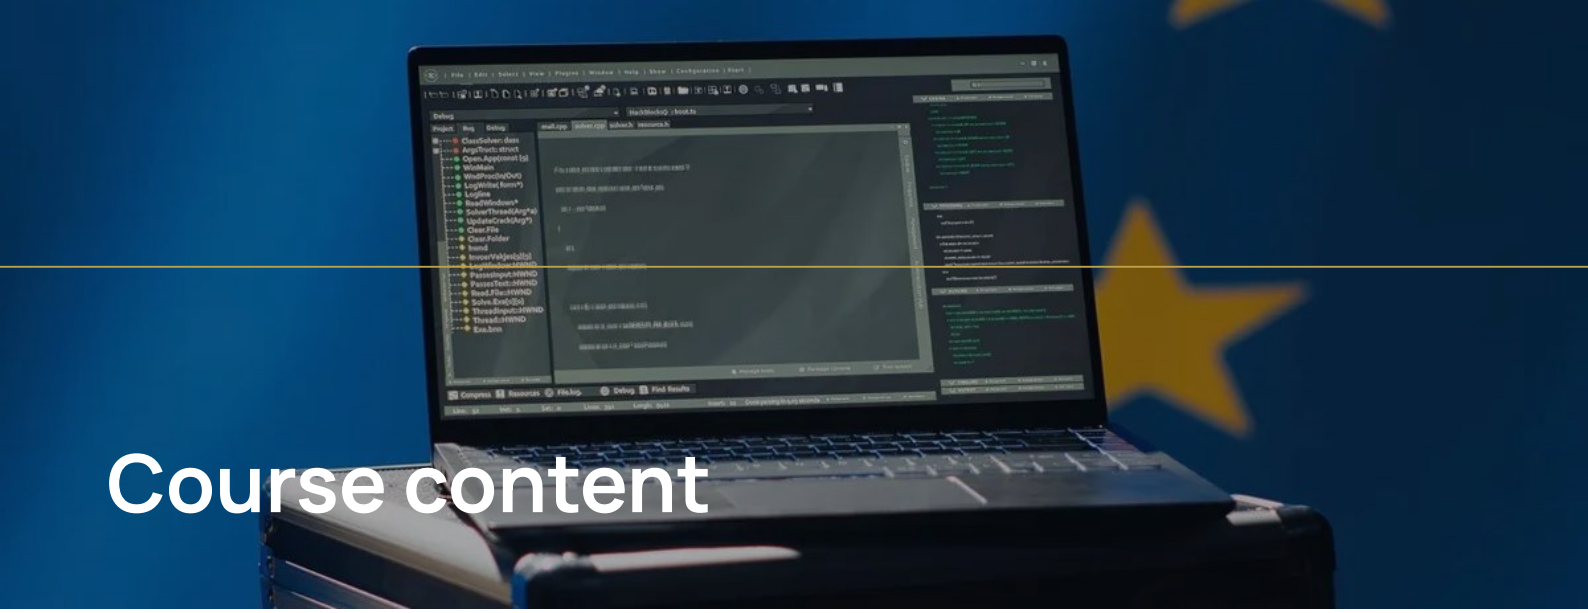

• Difficulty translating subject knowledge into practical workplace decisions.
• Inconsistent approaches to the activities covered in the course outline.
• Lack of a structured plan for applying and reviewing new skills.

Course methodology

The course combines expert explanation with AI system classification exercises, case studies, gap-assessment workshops, documentation templates and development of an AI compliance roadmap. It provides practical guidance and does not constitute legal advice.

Course objectives

By the end of this course, participants will be able to:
• Explain the scope, structure and timeline of the EU AI Act
• Identify roles such as provider, deployer, importer and distributor
• Classify AI systems according to risk categories
• Understand requirements for high-risk and general-purpose AI
• Build an AI inventory and conduct a compliance gap assessment
• Implement AI governance, documentation and monitoring processes

Course content
