Why attend

Mining, construction, ports and logistics depend on mobile equipment such as trucks, loaders, cranes and forklifts. This course covers maintenance of heavy mobile equipment: maintenance strategies, inspections, component life management, oil analysis, tyres, workshops, availability improvement and cost per hour control.

Mobile equipment downtime directly stops production. You will learn maintenance practices that maximise availability.

Professional Problems This Course Is Designed to Solve

- Difficulty translating subject knowledge into practical workplace decisions.
- Inconsistent approaches to the activities covered in the course outline.
- Lack of a structured plan for applying and reviewing new skills.

Course methodology

Case studies from mining and construction, component life exercises, oil analysis interpretation and planning workshops.

Course objectives

By the end of this course, participants will be able to:
- Plan maintenance strategies for mobile equipment
- Conduct effective inspections
- Manage component life and rebuilds
- Use oil analysis and condition data
- Manage tyres and wear parts
- Improve availability and control cost per hour

Target audience

This course is suitable for:
- Mobile equipment maintenance managers
- Workshop supervisors
- Maintenance planners
- Reliability engineers
- Fleet managers in heavy industry

Course content

Target competencies

Participants will develop competencies in:

- Maintenance strategy
- Inspection
- Component management
- Condition monitoring
- Cost control
