Why attend

Incident command systems provide a standard structure for managing emergencies of any size. This course covers ICS principles: command and control, span of control, functional sections, incident action planning, unified command with external agencies, resource management, communications and transition between response phases.

Confusion over who is in charge slows emergency response. You will learn a proven structure for coordinated incident management.

Professional Problems This Course Is Designed to Solve

- Difficulty translating subject knowledge into practical workplace decisions.
- Inconsistent approaches to the activities covered in the course outline.
- Lack of a structured plan for applying and reviewing new skills.

Course methodology

ICS structure exercises, incident action plan workshops, multi-agency simulations and case studies.

Course objectives

By the end of this course, participants will be able to:

- Explain incident command system principles
- Establish command and functional sections
- Apply span of control and organisation
- Develop incident action plans
- Work in unified command with external agencies
- Manage resources and communications

Target audience

This course is suitable for:

- Emergency response coordinators
- HSE managers
- Security managers
- Facility and operations managers
- Public safety officials

Course content
