Why attend

Security incidents such as malware, data leaks and account compromises need a fast, structured response. This course covers incident handling: preparation, detection and triage, containment, eradication and recovery, evidence handling, communication and notification, and post-incident review.

A disciplined incident response limits damage and cost. You will learn the incident handling process used by security teams.

Professional Problems This Course Is Designed to Solve

• Difficulty translating subject knowledge into practical workplace decisions.
• Inconsistent approaches to the activities covered in the course outline.
• Lack of a structured plan for applying and reviewing new skills.

Course methodology

Incident scenarios, triage exercises, playbook development and simulations.

Course objectives

By the end of this course, participants will be able to:
• Prepare incident response capabilities
• Detect and triage security incidents
• Contain and eradicate threats
• Recover systems and data safely
• Handle evidence and notifications
• Conduct post-incident reviews

Target audience

This course is suitable for:
• Security analysts and incident responders
• IT managers
• Information security officers
• Compliance professionals
• Crisis team members
