Why attend

Medical device manufacturers and suppliers must meet strict quality system requirements. This course provides awareness of medical device quality systems: ISO 13485, regulatory frameworks, design controls, risk management with ISO 14971, process validation, complaints and vigilance, post-market surveillance and supplier controls.

Medical device quality failures can harm patients and halt market access. You will understand the key requirements and how they fit together.

Professional Problems This Course Is Designed to Solve

- Difficulty translating subject knowledge into practical workplace decisions.
- Inconsistent approaches to the activities covered in the course outline.
- Lack of a structured plan for applying and reviewing new skills.

Course methodology

Standard walkthroughs, case studies of recalls, risk management exercises and document reviews.

Course objectives

By the end of this course, participants will be able to:

- Explain medical device regulatory frameworks
- Understand ISO 13485 requirements
- Describe design controls
- Apply risk management principles
- Understand process validation requirements
