Why attend

Organisations rely on models for credit decisions, pricing, forecasting, capital and increasingly AI. Model risk arises when models are wrong or misused. This course covers model risk frameworks, model inventory, development standards, validation, performance monitoring, AI model considerations and governance.

Model errors can lead to significant financial loss and regulatory findings. This course helps you establish effective model risk management.

Professional Problems This Course Is Designed to Solve

- Difficulty translating subject knowledge into practical workplace decisions.
- Inconsistent approaches to the activities covered in the course outline.
- Lack of a structured plan for applying and reviewing new skills.

Course methodology

The course uses validation case studies, inventory and tiering exercises, monitoring workshops and governance design.

Course objectives

By the end of this course, participants will be able to:

- Explain sources and impact of model risk
- Build a model inventory and risk tiering
- Set model development and documentation standards
- Plan independent model validation
- Monitor model performance and limitations
- Govern AI and machine learning models

Target audience

This course is suitable for:

- Risk managers
- Model developers and validators
- Quantitative analysts
- Internal auditors
- Compliance professionals

Course content

Target competencies

Participants will develop competencies in:

- Model risk assessment
- Model inventory
- Model validation
- Performance monitoring
- AI model governance
