Why attend

Critical infrastructure such as energy, water, transport, telecommunications and health systems must remain resilient against physical, cyber and natural threats. This course covers critical infrastructure protection frameworks, interdependencies, risk assessment, resilience measures, regulation and public-private cooperation.

Failures in critical infrastructure can cascade across society. This course helps operators and authorities manage these risks systematically.

Professional Problems This Course Is Designed to Solve

- Difficulty translating subject knowledge into practical workplace decisions.
- Inconsistent approaches to the activities covered in the course outline.
- Lack of a structured plan for applying and reviewing new skills.

Course methodology

The course uses interdependency mapping, risk assessment workshops, case studies of infrastructure failures and scenario exercises.

Course objectives

By the end of this course, participants will be able to:
- Explain critical infrastructure protection frameworks
- Map interdependencies between infrastructure sectors
- Assess all-hazard risks
- Design resilience and protection measures
- Understand relevant regulation
- Coordinate with authorities and partners

Target audience

This course is suitable for:
- Critical infrastructure operators
- Risk and resilience managers
- Security professionals
- Government officials
- Utility and transport managers

Course content

Target competencies

Participants will develop competencies in:

- Infrastructure risk assessment
- Interdependency analysis
- Resilience design
- Regulatory compliance
- Public-private coordination
- Scenario planning
