Course content

Why attend

Robotic process automation and intelligent automation help organisations remove repetitive manual work, reduce errors and free employees for higher-value tasks. This course explains how to identify suitable processes, assess automation potential, design and build software robots, combine RPA with AI capabilities such as document understanding, and govern an automation programme at scale. Participants complete hands-on exercises with automation tools and develop an automation opportunity pipeline and business case for their own organisation.

Many organisations still rely on employees to copy data between systems, process standard documents and run routine reports. This course shows you how to identify and prioritise automation opportunities, deliver early results and build a sustainable, well-governed automation capability.

Professional Problems This Course Is Designed to Solve

• Difficulty translating subject knowledge into practical workplace decisions.
• Inconsistent approaches to the activities covered in the course outline.
• Lack of a structured plan for applying and reviewing new skills.

Course methodology

Learning includes process analysis workshops, demonstrations and hands-on exercises with automation tools, case studies of automation programmes, business case development and group work on governance models.

Course objectives

By the end of this course, participants will be able to:
• Explain RPA, intelligent automation and their business benefits
• Identify and assess processes suitable for automation
• Document processes and design automation solutions
• Build simple automations using RPA tools
• Combine RPA with AI for documents, decisions and communication
• Establish governance and a centre of excellence for automation

Course content

Target audience

This course is suitable for:

- Business process and operations improvement professionals
- Finance, HR and shared services managers
- IT and digital transformation professionals
- Business analysts
- Managers responsible for productivity and efficiency programmes

Target competencies

Participants will develop competencies in:

- Process assessment
- Automation design
- RPA development fundamentals
- Intelligent document processing
- Automation governance
- Business case development

Course outline

Day 1: Introduction to Automation

09:00–09:54	RPA, workflow automation and intelligent automation compared
09:54–10:48	Benefits, limitations and common misconceptions
10:48–11:00	Typical use cases in finance, HR, procurement and customer service
11:00–11:30	**Coffee break**
11:30–12:12	Typical use cases in finance, HR, procurement and customer service (continued)
12:12–13:06	The automation life cycle
13:06–14:00	Exercise: Spotting automation opportunities in daily work

Day 2: Identifying and Assessing Processes

09:00–09:54	Process selection criteria and automation potential
09:54–10:48	Process mapping and standardisation before automation
10:48–11:00	Estimating effort, savings and complexity

Course content

11:00–11:30	**Coffee break**
11:30–12:12	Estimating effort, savings and complexity (continued)
12:12–13:06	Building an opportunity pipeline
13:06–14:00	Workshop: Assessing candidate processes

Day 3: Designing and Building Robots

09:00–09:54	Automation design documents
09:54–10:48	Core RPA concepts: selectors, variables, workflows and exceptions
10:48–11:00	Attended and unattended automation
11:00–11:30	**Coffee break**
11:30–12:12	Attended and unattended automation (continued)
12:12–13:06	Testing and quality assurance
13:06–14:00	Lab: Building a simple automation

Day 4: Intelligent Automation

09:00–09:54	Document understanding and data extraction
09:54–10:48	Combining automation with generative AI
10:48–11:00	Process mining to discover automation opportunities
11:00–11:30	**Coffee break**
11:30–12:12	Process mining to discover automation opportunities (continued)
12:12–13:06	Human-in-the-loop design
13:06–14:00	Case study: Automating invoice processing end to end

Day 5: Scaling and Governing Automation

09:00–09:54	Centre of excellence models
09:54–10:48	Security, access and controls
10:48–11:00	Monitoring, maintenance and change management

Course content

11:00–11:30	**Coffee break**
11:30–12:12	Monitoring, maintenance and change management (continued)
12:12–13:06	Measuring value and reporting results
13:06–14:00	Capstone: Automation business case and roadmap

The timings provided are estimates and may vary depending on the number of participants and the discussions taking place during the sessions. They are indicative only and do not constitute a binding commitment.

Dates, venues and fees

Current published course plans. Fees are per participant in GBP, excluding unconfirmed taxes.

Venue	Start date	End date	Fee (GBP)
Singapore Confirmed dates	9 Nov 2026	13 Nov 2026	**£2,820.–**
