Why attend

When many teams work on the same products or programmes, agile practices must be coordinated across teams. This course explains common approaches to scaling agile, including team-of-teams structures, planning increments, portfolio management, dependency management and governance. Participants compare frameworks and design a scaling approach suited to their organisation.

Scaling agile poorly can create more bureaucracy rather than less. This course helps leaders choose and adapt practices that improve coordination while preserving agility.

Professional Problems This Course Is Designed to Solve

• Difficulty translating subject knowledge into practical workplace decisions.
• Inconsistent approaches to the activities covered in the course outline.
• Lack of a structured plan for applying and reviewing new skills.

Course methodology

The course uses framework comparisons, planning simulations, case studies and design workshops.

Course objectives

By the end of this course, participants will be able to:
• Explain the challenges of scaling agile
• Compare common scaling frameworks and approaches
• Organise teams of teams around value streams
• Coordinate planning and dependencies across teams
• Apply lean portfolio management
• Design a scaling approach and adoption roadmap

Target audience

This course is suitable for:
• Agile coaches and transformation leads
• Programme and portfolio managers
• Senior IT and product leaders
• Release train and delivery managers
• PMO leaders

Course content

Target competencies

Participants will develop competencies in:
