Why attend

Governance, risk and compliance software can streamline risk registers, controls testing, policies and audits, but implementations often disappoint. This course covers defining GRC requirements, market options, vendor selection, data and process design, implementation planning, user adoption and measuring benefits.

Buying a GRC platform before fixing processes rarely works. You will learn to choose and implement software that supports your GRC programme.

Professional Problems This Course Is Designed to Solve

• Difficulty translating subject knowledge into practical workplace decisions.
• Inconsistent approaches to the activities covered in the course outline.
• Lack of a structured plan for applying and reviewing new skills.

Course methodology

Requirements workshops, vendor scoring exercises, case studies and implementation planning.

Course objectives

By the end of this course, participants will be able to:
• Assess GRC process maturity before buying
• Define functional and technical requirements
• Compare GRC software options
• Run a structured vendor selection
• Plan implementation and data migration
• Drive adoption and measure benefits

Target audience

This course is suitable for:
• Risk and compliance managers
• Internal audit leaders
• IT project managers
• GRC administrators
• Governance professionals

Course content

Target competencies

Participants will develop competencies in:

- Requirements definition
- Vendor evaluation
- Process design
- Implementation planning
- Adoption
