Why attend

Supply chains generate large volumes of data that can improve planning, cost and service. This course teaches practical supply chain analytics: data preparation, descriptive dashboards, root cause analysis, demand and inventory analytics, network and transport analysis, and building analytics capability in supply chain teams.

Decisions based on data outperform those based on habit. You will learn analytics techniques that deliver quick wins.

Professional Problems This Course Is Designed to Solve

- Difficulty translating subject knowledge into practical workplace decisions.
- Inconsistent approaches to the activities covered in the course outline.
- Lack of a structured plan for applying and reviewing new skills.

Course methodology

Hands-on spreadsheet and BI exercises, case studies and analytics project planning.

Course objectives

By the end of this course, participants will be able to:

- Prepare and clean supply chain data
- Build supply chain dashboards
- Analyse service, inventory and cost performance
- Use root cause and Pareto analysis
- Apply analytics to transport and network questions
- Build an analytics roadmap for supply chain

Target audience

This course is suitable for:
